

Zihao Zhang

Master's Student at Fudan University · Advisor: Prof. Zuxuan Wu
Shanghai, China · bblcdver@gmail.com · GitHub · Google Scholar

RESEARCH PROFILE

My research focuses on efficient and controllable video generation, spatiotemporal modeling, and post-training methods for generative video models. I study diffusion-based video frame interpolation, motion editing, camera-controllable generation, and reinforcement learning with on-policy distillation.

EDUCATION

Sep 2023 — Jun 2026	Fudan University Master's degree in Computer Science · Shanghai, China School of Computer Science · Advisor: Prof. Zuxuan Wu
Sep 2018 — Jun 2022	Wuhan University Undergraduate study · Wuhan, China School of Chemistry and Molecular Sciences

RESEARCH EXPERIENCE

Apr 2025 — Jan 2026	Algorithm Intern · Bilibili Inc. Virtual Human Group · Shanghai, China • Efficient and controllable visual generation with reinforcement learning.
Jul 2024 — Mar 2025	Algorithm Intern · Huawei Noah's Ark Lab · Shanghai, China • Controllable image and video generation.

RESEARCH DIRECTIONS

Oct 2023 — Present	Efficient and Controllable Video Generation & Spatiotemporal Modeling · • Diffusion-based video frame interpolation, motion editing, and camera-controllable generation, with an emphasis on temporal consistency, structural alignment, and high-frequency detail fidelity. • Multimodal conditioning, spatial reasoning, start/end-frame control, human-pose and camera-trajectory control, pixel-space modeling, one-step generation, and lightweight network design.
Jan 2026 — Present	Reinforcement Learning & On-Policy Distillation for Video Generation · • Multi-dimensional reward feedback and student-distribution teacher supervision to improve generation quality, motion, and temporal consistency while reducing train–inference distribution shift.
